PAJERO

◆ THE LEGENDARY PAJERO retains the old-world ruggedness and charm, even down to its vents and air-conditioning controls, which are knobs instead of the customary digital switches. The bodyshell might look a tad dated on the outside, but there's nothing remotely dated about its cooling efficiency. The Pajero managed to bring the cabin temperature down to 29.4 degree Celsius with its vent temperature at 12.6 degree Celsius.
