

Veer fine, thank you

This is Hindustan Motors' Veer small commercial vehicle (SCV). Based on the tried and tested Ambassador platform, the Veer has a 0.8 tonne load capacity and changes to the suspension and transmission have been made to the existing platform in order to suit the purpose it is built for. It is available in the single-cabin format with a loading bay at the back and is also available in the drive-away chassis (front cabin only) form. As of the moment, the Veer is only on sale in Eastern India but HM has plans to go pan-India in the current financial year itself. It is priced at ₹ 3.30 lakh (ex-showroom, Kolkata).
