

Indian automaker launched NGVs road show, NGV Journal, October 12

The tour includes three CNG-powered vehicles from Hindustan Motors Limited (HML) 34-acre plant in Pithampur, which will cover important cities in states of Maharashtra and Gujarat before returning to Pithampur via Indore. It was flagged off by B C Mishra, Corporate Finance general manager.

The road show, organized to increase awareness about existing, upgraded and new HML natural gas vehicles both in the passenger and commercial segments, will display an Ambassador Discovery, a Winner CNG XD 1.8 cargo vehicle and a 10-seat commercial vehicle, all BS4 compliant.

India's oldest car manufacturer has already organized a number of road shows, which have been met with enthusiasm in the states of West Bengal, Assam, Orissa Tamil Nadu and Puducherry, according to RushLane.com.

According to Manoj Jha, managing director of HML, customer satisfaction along with preservation of the environment was the ultimate goal of the company. "This road show is our humble contribution to sustainable development through a host of upgraded variants and new vehicles. We are all set to introduce more new vehicles and enhance choice for automobile customers," he said.
